

Det 10. Organisk Kjemiske Høstmøte (2005): New Trends in Organic and Organometallic Chemistry

Møtet ble holdt i Ingeniørenes hus, Oslo, 11. november 2005 og samlet 64 deltakere.

Foredrag:

- **Reko Leino.** Åbo Akademi University, Finland.

Allylations, Hydrosilylations and Olefin Methathesis as Simple Tools in Building Block, Chiral Modifier and Ligand Synthesis."

- **Corrinne Aubert.** Université Pierre et Marie Curie, Paris, Frankrike.

Cobalt-Mediated Cyclizations: Some New Developments and Synthetic Application.

- **Morten Jørgensen.** Lundbeck A/S, Valby, Danmark.

Palladium-Catalyzed Multicomponent Reactions Involving Formation of C-S, C-N, and C-C Bonds.

- **Jean Rodriguez.** Université Paul Cézanne, Marseille, Frankrike.

Domino Transformations Based on the Reactivity of alpha-activated Ketones: New Tools in Heterocyclic Chemistry.

- **John A. Gladysz.** Universität Erlangen-Nürnberg, Tyskland.

Alkene Metathesis in Metal Coordination Spheres: The Quest for Molecular Gyroscope.

- **Thisbe K. Lindhorst.** Christiana Albertina University of Kiel, Tyskland.

Ligand Binding to the Bacterial Lectin FimH and What We Can Learn from it.
