

Norwegian Chemical Society

Norsk Kjemisk Selskap NKS

www.kjemi.no

The Norwegian Chemical Society's charter is:

- to advance the chemical knowledge within science, education and industry
- to serve the interests of its members in the practice of the chemical sciences

NKS is a national society comprising local branches, professional divisions and committees and task groups. The local branches arrange scientific meetings and excursions while the professional divisions organize national and international seminars, courses and conferences.

NKS is governed by a board of prominent chemists whose activities relate to the overall needs of the Society; for example, maintaining relationships with international bodies, national organisations and authorities. NKS has also established two annual seminar series given by invited speakers - the Hassel lecture series and the Industry lecture series.

Professional divisions and committees

Analytical chemistry
Nutrition and food additive technology
Catalysis
Chemometrics
Macromolecular and colloid chemistry
Organic chemistry
Computational Chemistry

Chemical education committee
Media contact committee
Nomenclature and terminology committee

Local branches

Østfold
Oslo
Grenland
Agder
Rogaland
Bergen
Trondhjem
Nord-Norge

Journal of The Norwegian Chemical Society

The Society's official organ is the journal 'Kjemi' (Chemistry), which appears as ten numbers per year. The cost of the journal is included in the subscription fee and issues are distributed to all members resident in Scandinavia. Published papers are indexed in the CAS.

Membership

Anyone with an interest in chemistry may become a member. See www.kjemi.no

NKS is a member of
EuChemS and IUPAC
